

Project Initialization and Planning Phase

Date	14 July 2026
Team ID	SWTID-2026-2280
Project Name	EduGenie – AI-Powered Educational Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The problem statement identifies the primary challenge faced by the target users and explains why a solution is needed. It helps the team understand the user's perspective, define the project's objectives, and develop features that effectively address real-world learning problems. For EduGenie, the goal is to provide an AI-powered educational assistant that offers quick answers, summaries, quizzes, flashcards, and personalized learning paths to make studying easier and more efficient.

Problem Statement	Content
I am (Customer)	A student, self-learner, or educator.
I'm trying to	Learn new concepts, clear doubts, and prepare effectively for exams.
But	Educational resources are scattered, time-consuming, and difficult to understand.
Because	There is no single platform that provides AI-powered answers, summaries, quizzes, flashcards, and personalized learning guidance together.
Which makes me feel	Frustrated, overwhelmed, and less confident while studying.
