

Project Initialization and Planning Phase

Date	14 July 2026
Team ID	SWTID-2026-2280
Project Title	EduGenie – AI-Powered Educational Assistant
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

Project Overview	
Objective	Develop an AI-powered educational assistant that helps students and self-learners by providing intelligent question answering, quiz generation, text summarization, personalized learning paths, and flashcards using Generative AI.
Scope	The project focuses on improving the learning experience through AI-powered educational tools accessible via a simple web interface.
Problem Statement	
Description	Students often spend significant time searching for reliable study materials across multiple platforms. Existing resources may be lengthy, scattered, and not personalized, making learning inefficient.
Impact	• Faster access to educational content. • Improved learning efficiency. • Personalized learning support. • Better revision using quizzes and flashcards.
Proposed Solution	
Approach	Develop a web-based AI educational assistant using FastAPI and Google Gemini API to generate intelligent educational content in real time.
Key Features	• Intelligent Question Answering • Quiz Generation • Text Summarization • Personalized Learning Path • Flashcard Generator

Resource Requirements

Resource Type	Description	Specification
Hardware	Computing Resources	Intel i5/Ryzen 5 or higher
Memory	RAM	8 GB
Storage	SSD	20 GB Free Space
Software	Framework	FastAPI
Libraries	Python Libraries	google-generative Ai, pydantic, python-dotenv
Development Environment	IDE	VS Code
Data	AI Model	Google Gemini API
